Acid-base equilibrium
base excess and inappropriate bicarbonate (Fagan), CORRESPONDENCE, 67
effects of pH variations on short-latency somatosensory evoked potentials in pigs (Eberle et al), 136A
Analgesia, postoperative
issues in displaying patient-controlled analgesia demand data (Milgram et al), 233A
Anesthesia
depth
electroencephalogram spectral edge frequency, lower esophageal contractility, and autonomic responsiveness during general anesthesia (Ghouri et al), ORIGINAL ARTICLE, 176
neurosurgical
a reference system in clinical anesthesia (Martens and Zapf), ALGORITHM, 202
obstetric
basic computer-aided instruction for obstetric anesthesia (Seitman and Nir), 220A
pediatric
dynamic response of a neonatal catheter-manometer system in situ (van Langen et al), ORIGINAL ARTICLE, 335
the esophageal temperature gradient in anesthetized children (Bloch et al), ORIGINAL ARTICLE, 73
relaxation
visual/auditory relaxation and sedation (Silverman et al), 214A
Anesthesiologists
a patient simulator for the training of anesthesiologists (Herz et al), 230A
performance of trauma anesthesiologists assessed by a synthetic work environment (Craig et al), 228A
workload
a survey of anesthesiologists' attitudes toward production pressures (Howard et al), 231A
Anesthetic techniques
closed circle
an adaptive controller for the administration of closed-circuit anesthesia during spontaneous and assisted ventilation (Sharma et al), ORIGINAL ARTICLE, 25
current anesthesia breathing systems are just fine (Nichols), CLINICAL CONTROVERSY, 63
editorial introduction to anesthesia breathing systems controversy (Blitt), CLINICAL CONTROVERSY, 60
sampled gas need not be returned during low-flow anesthesia (Bengtson et al), ORIGINAL ARTICLE, 330
the time has come for evolution from the circle breathing system (Simon et al), CLINICAL CONTROVERSY, 60
hypotension, induced
persistent free-flow infusions (Shapiro), CORRESPONDENCE, 381
inhalation
acceptable ranges for vital signs during general anesthesia (van Oostrom et al), ORIGINAL ARTICLE, 321
low flow
incidence of hypoxemia due to a hypoxic mixture in low flow anesthesia when using nitrous oxide (Deshane and Edsall), 214A
sampled gas need not be returned during low-flow anesthesia (Bengtson et al), ORIGINAL ARTICLE, 330
regional
quantitative testing of sympathetic function with laser Doppler flowmetry (Valley et al), ORIGINAL ARTICLE, 252
simulations
a patient simulator for the training of anesthesiologists (Herz et al), 230A
Anesthetics
gases
the esophageal temperature gradient in anesthetized children (Bloch et al), ORIGINAL ARTICLE, 73
evaluation of three transportable multigas anesthetic monitors: the Bruel & Kjaer Anesthetic Gas Monitor 1304, the Datex Capnomac Ultima, and the Nellcor N-2500 (Nielsen et al), ORIGINAL ARTICLE, 91
nitrous oxide
incidence of hypoxemia due to a hypoxic mixture in low flow anesthesia when using nitrous oxide (Deshane and Edsall), 214A
nitrous oxide depresses somatosensory evoked responses in anesthetized swine (Schäfer et al), 135A
sampled gas need not be returned during low-flow anesthesia (Bengtson et al), ORIGINAL ARTICLE, 330
stability of pressurized calibration gases (Wallroth et al), 215A
intravenous
analytical method to differentiate similar electroencephalographic spectra: neural network and discriminant analysis (Veselis et al), ORIGINAL ARTICLE, 257
comparison of electroencephalography, cerebral perfusion pressure, and recovery times following propofol or methohexital sedation in neurosurgical patients (Löffler et al), 146A
effects of propofol (Disoprivan) during induction of anesthesia: a topographical electroencephalographic study (Neuhierl et al), 124A
propofol
an update on pharmacologic cerebroprotection (Petricek and Spiss), 160A
effect of propofol on the relation between arterial CO_2 and cerebral blood flow velocity (Jansen et al), 145A
monitoring of spontaneous bioelectrical rhythms under propofol (Fuchs et al), 144A
sedation of head-injured patients for neuroradiological investigations (Rafferty and Fitch), 131A
volatile
accuracy and cross-sensitivity of 10 different anesthetic gas monitors (Walder et al), ORIGINAL ARTICLE, 364
beat-to-beat variability can indicate subtle differences in

Copyright © 1993 by Little, Brown and Company

Anesthetics (*continued*)
cardiovascular effects of anesthesia (Maslana et al), 221A
desflurane
FT-IR spectrum of desflurane (Walker and Bandekar), 217A
isoflurane
intraoperative topographical electroencephalographic monitoring during steady-state isoflurane-N_2O anesthesia: effect of surgical stimulation (Kochs et al), 123A
refractometry as a calibration standard for gas monitors and vaporizers (Wallroth et al), 216A
Arteries
interior cerebral
computer-assisted model to investigate the circulatory characteristics of the anterior cerebral artery (Füzes), 140A

Blood
coagulation
effect of delay and storage on whole-blood clotting analysis as determined by thrombelastography (Orlikowski et al), ORIGINAL ARTICLE, 5
hemoglobin
the effect of dyshemoglobins on pulse oximetry: part I, theoretical approach and part II, experimental results using an in vitro test system (Reynolds et al), ORIGINAL ARTICLE, 81
Blood pressure
measurement
noninvasive continuous blood pressure measurement: a clinical evaluation of the Cortronic APM 770 (de Jong et al),, 18
peripheral vascular effects on auscultatory blood pressure (Rabbany et al), ORIGINAL ARTICLE, 9
Book reviews
Claude Bernard's lectures on anesthetics and asphyxia (Severinghaus), 121
drug infusions in anesthesiology (Philip), 211
handbook of blood pressure measurement (Block), 72
respiratory monitoring, vol 1, no. 4 of contemporary management in critical care (Feldman), 211
Brain
blood flow
an update on pharmacologic cerebroprotection (Petricek and Spiss), 160A
cerebral blood flow measurement in critically ill patients (Barelli et al), 154A
changes in mean blood flow velocity in the middle cerebral artery and corresponding somatosensory evoked potentials during induction of anesthesia (Lörler et al), 152A
comparison of electroencephalography, cerebral perfusion pressure, and recovery times following propofol or methohexital sedation in neurosurgical patients (Löffler et al), 146A
detection of critical focal ischemia using hemodynamic, metabolic, and functional cerebral monitoring (Dinkel), 158A
effect of propofol on the relation between arterial CO_2 and cerebral blood flow velocity (Jansen et al), 145A
intraoperative monitoring of cerebral perfusion during surgery of giant aneurysms: possibilities and limitations (Boecher-Schwarz et al), 153A
transcranial Doppler and intracranial pressure: complementary diagnostic tools in neurointensive care medicine (Reinprecht), 154A
transcranial Doppler for physiologic testing of autoregulation (Aaslid), 149A
transcranial Doppler in patients after severe head injury: correlation between TCD, CBF, ICP, MAP, and CCT findings (Burger et al), 154A
transcranial Doppler monitoring in cerebral AVM surgery (Schaller and Hassler), 152A
transcranial Doppler monitoring in patients with large brain tumors: effects of thiopental, propofol, and hyperventilation (Schregel et al), 153A
transcranial Doppler sonography in anesthesia and critical care: trend monitoring of cerebral hemodynamics? (Werner et al), 150A
interstitial substance microdialysis
the perspectives of intracerebral microdialysis (Illievich et al), 155A
intracranial pressure
clinical experience with a fiberoptic intracranial pressure monitor (Yablon et al), ORIGINAL ARTICLE, 171
oxygenation
near-infrared monitoring of the cerebral circulation (Kurth et al), ORIGINAL ARTICLE, 163
Bronchodilator agents
bronchodilator aerosol propellant interferes with an infrared photoacoustic spectrophotometer respiratory gas analyzer (Hoskin and Dallen), CORRESPONDENCE, 65

Cerebrospinal fluid, pressure
the fidelity and dynamic response of fluid-filled catheter systems for direct measurement of lumbar cerebrospinal fluid pressure (Kumar et al), ORIGINAL ARTICLE, 314
Complications
arteriovenous malformations
arterial pulse contour analysis trending of cardiac output: hemodynamic manipulations during cerebral arteriovenous malformation resection (Weissman et al), 347
brain edema
changes in the colloid osmotic pressure and hematocrit using a new electrolyte-free hydroxyethyl starch solution for antiedematous therapy (Walle et al), 161A
therapy of brain edema with glycerol: the relations between pharmacokinetics and intracranial pressure monitoring (Haass), 160A
burns
urinary bladder temperature monitoring in extensively burned patients (Imaizumi et al), CASE REPORT, 99
coma
coma prognosis by means of electrophysiological variables: possibilities and limits (Lechner et al), 144A
noninvasive cerebral intensive care monitoring: theory, technology, trends, and practice (Litscher et al), 126A
passive auditory event-related potentials in comatose patients (Windhager et al), 148A
quantitative electroencephalography and multimodality potentials as prognostic indices in postanoxic coma (Barelli et al), 129A

relation between intracranial pressure and serial multimodal evoked potentials in coma (Dauch and Becker), 129A
convulsions
the effects of plasma laudanosine on the electroencephalogram in patients with chronic renal failure (Hrska et al), 125A
encephalitis
brainstem acoustic evoked potentials in encephalitis (Schwarz et al), 129A
equipment failure
failure of an automated noninvasive blood pressure device: the contribution of human error and software design flaw (Howard), 232A
failure of clinical signs to confirm intravascular placement of a central venous catheter (Ontell and Nearman), CORRESPONDENCE, 71
persistent free-flow infusions (Shapiro), CORRESPONDENCE, 381
fatigue
performance of trauma anesthesiologists assessed by a synthetic work environment (Craig et al), 228A
head injuries
cerebral blood flow measurement in critically ill patients (Barelli et al), 154A
continuous electroencephalographic and oxygen jugular saturation monitoring as a guide to treatment of severe head injury (Procaccio et al), 132A
continuous monitoring of cerebral oxygen extraction (Mauritz), 132A
electroencephalographic and evoked potential monitoring in intensive care medicine: indications, limitations, and quality control (Schoeppner), 127A
indication and technique for intracranial pressure measurement in head trauma (Swarz and Buchinger), 130A
multimodality monitoring in the intensive care unit: studies in patients with a head injury (Fitch et al), 131A
role of multimodality evoked potentials in head-injured patients (Barelli et al), 137A
sedation of head-injured patients for neuroradiological investigations (Rafferty and Fitch), 131A
transcranial Doppler in patients after severe head injury: correlation between TCD, CBF, ICP, MAP, and CCT findings (Burger et al), 154A
hemorrhage
intraperitoneal hemorrhage following femoral artery cannulation for intraoperative monitoring: an unusual complication (Sim et al), CASE REPORT, 295
hypotension
monitoring-induced hypotension under consideration of fluorescence-spectrographic oxygen measurement (Wölfel and Knorr), 141A
hypoxemia
incidence of hypoxemia due to a hypoxic mixture in low flow anesthesia when using nitrous oxide (Deshane and Edsall), 214A
integration of monitoring for intelligent alarms in anesthesia: neural networks–can they help (Mylrea et al), ORIGINAL ARTICLE, 31
intubation, endotracheal
capnography does not reliably detect double-lumen endotracheal tube malplacement (Kumar et al), CORRESPONDENCE, 207
video analysis of two emergency tracheal intubations identifies errors in decision making (Mackenzie et al), 227A
neoplasms
transcranial Doppler monitoring in patients with large brain tumors: effects of thiopental, propofol, and hyperventilation (Schregel et al), 153A
nerve damage
somatosensory evoked potential, a prognostic tool for the recovery of motor function following malperfusion of the spinal cord: studies in dogs (Grabitz et al), ORIGINAL ARTICLE, 191
spinal evoked potential in patients undergoing thoracoabdominal aortic reconstruction: a prognostic indicator of postoperative motor deficit (Grabitz et al), ORIGINAL ARTICLE, 186
tamponade
fatal cardiac perforation caused by the dilator of a central venous catheterization kit (Mitchell et al), CASE REPORT, 288
the time has come for evolution from the circle breathing system (Simon et al), CLINICAL CONTROVERSY, 60
water-electrolyte balance
changes in the colloid osmotic pressure and hematocrit using a new electrolyte-free hydroxyethyl starch solution for antiedematous therapy (Walle et al), 161A
Cortronic APM 770 *see under* Equipment: blood pressure cuffs

Decision making, computer-assisted
problem solving in anesthesia: what are the real problems being solved (Milgram et al), 234A
a reference system in clinical anesthesia (Martens and Zapf), ALGORITHM, 202

Education
computer-assisted
basic computer-aided instruction for obstetric anesthesia (Seitman and Nir), 220A
efficiency and patient care: how systems training can help (Pettus and Bloom), 229A
patient simulator for the training of anesthesiologists (Herz et al), 230A
technology education program for anesthetists (Frazier et al), 236A
Embolism
air
real-time automated computerized detection of venous air emboli in dogs (Gibby), ORIGINAL ARTICLE, 354
fat
the prognostic value of somatosensory evoked potentials in patients with cerebral fat embolism (Rumpl et al), 128A
Equipment
alarms
improving the performance of a neural network-based alarm system (Farrell et al), 223A
integration of monitoring for intelligent alarms in anesthesia: neural networks–can they help (Mylrea et al), ORIGINAL ARTICLE, 31

Equipment (*continued*)
anesthesia machines
an adaptive controller for the administration of closed-circuit anesthesia during spontaneous and assisted ventilation (Sharma et al), ORIGINAL ARTICLE, 25
current anesthesia breathing systems are just fine (Nichols), CLINICAL CONTROVERSY, 63
erroneous data from an infrared anesthetic gas analyzer (Morrison and McDonald), CASE REPORT, 293
future anesthesia workstations and today's priorities (Paulsen), CORRESPONDENCE, 65
the time has come for evolution from the circle breathing system (Simon et al), CLINICAL CONTROVERSY, 60
auscultation
peripheral vascular effects on auscultatory blood pressure (Rabbany et al), ORIGINAL ARTICLE, 9
blood gas analyzers
near-patient blood gas and electrolyte analyses are accurate when performed by non-laboratory-trained individuals (Zaloga et al), ORIGINAL ARTICLE, 341
blood pressure
algorithm to identify components of arterial blood pressure signals during use of an intra-aortic balloon pump (Elghazzawi et al), ALGORITHM, 297
blood pressure cuffs
noninvasive continuous blood pressure measurement: a clinical evaluation of the Cortronic APM 770 (de Jong et al), ORIGINAL ARTICLE, 18
capnometers
capnography does not reliably detect double-lumen endotracheal tube malplacement (Kumar et al), CORRESPONDENCE, 207
inaccurate capnograph waveform (Hall), CORRESPONDENCE, 309
pulse oximetry, capnography, and blood gas measurements: reducing cost and improving the quality of care with technology (Roizen et al), ORIGINAL ARTICLE, 237
catheter-transducer systems
construction and use of catheter-manometer systems (Heimann and Murray), ORIGINAL ARTICLE, 45
the fidelity and dynamic response of fluid-filled catheter systems for direct measurement of lumbar cerebrospinal fluid pressure (Kumar et al), ORIGINAL ARTICLE, 314
catheters
arterial
intraperitoneal hemorrhage following femoral artery cannulation for intraoperative monitoring: an unusual complication (Sim et al), CASE REPORT, 295
dynamic response of a neonatal catheter-manometer system in situ (van Langen et al), ORIGINAL ARTICLE, 335
right heart, right principle, wrong catheter (Gould), CORRESPONDENCE, 208
venous
failure of clinical signs to confirm intravascular placement of a central venous catheter (Ontell and Nearman), CORRESPONDENCE, 71
fatal cardiac perforation caused by the dilator of a central venous catheterization kit (Mitchell et al), CASE REPORT, 288
computers
an adaptive controller for the administration of closed-circuit anesthesia during spontaneous and assisted ventilation (Sharma et al), ORIGINAL ARTICLE, 25
an Apple Macintosh client for the Hewlett-Packard Component Monitoring System (Engel), 235A
basic computer-aided instruction for obstetric anesthesia (Seitman and Nir), 220A
computer-aided patient care system (Fukui et al), 235A
computer-assisted model to investigate the circulatory characteristics of the anterior cerebral artery (Füzes), 140A
efficiency and patient care: how systems training can help (Pettus and Bloom), 229A
electronic data archiving for clinical research in the operating room (Calalang and Philip), 231A
future anesthesia workstations and today's priorities (Paulsen), CORRESPONDENCE, 65
improving the user interface of an automated anesthetic recordkeeper (Jones et al), 230A
a modular multichannel data-acquisition system for biosignals with optical data transfer to a PC (Hadl et al), 156A
problem solving in anesthesia: what are the real problems being solved (Milgram et al), 234A
real-time automated computerized detection of venous air emboli in dogs (Gibby), ORIGINAL ARTICLE, 354
a reference system in clinical anesthesia (Martens and Zapf), ALGORITHM, 202
the Relaxometer: a complete and comprehenseve computer-controlled neuromuscular transmission measurement system developed for clinical research on muscle relaxants (Rowaan et al), ORIGINAL ARTICLE, 31
standards
standards for the anesthesia workstation (Wallroth et al), 216A
Doppler ultrasound
real-time automated computerized detection of venous air emboli in dogs (Gibby), ORIGINAL ARTICLE, 354
flowmeters
a respiratory flowmeter based on a modified mainstream CO_2 cuvette (Orr et al), 215A
manometers
dynamic response of a neonatal catheter-manometer system in situ (van Langen et al), ORIGINAL ARTICLE, 335
monitors
accuracy and cross-sensitivity of 10 different anesthetic gas monitors (Walder et al), ORIGINAL ARTICLE, 364
evaluation of three transportable multigas anesthetic monitors: the Bruel & Kjaer Anesthetic Gas Monitor 1034, the Datex Capnomac Ultima, and the Nellcor N-2500 (Nielsen et al), ORIGINAL ARTICLE, 91
integrated
integration of monitoring for intelligent alarms in anesthesia: neural networks–can they help (Mylrea et al), ORIGINAL ARTICLE, 31
miniaturized integrated biosensors for in vivo monitoring (Kepplinger et al), 161A
oxygen analyzers
pulse oximetry, capnography, and blood gas measurements: reducing cost and improving the quality of care with technology (Roizen et al), ORIGINAL ARTICLE, 237

plethysmographs
the detection of peripheral venous pulsation using the pulse oximeter as a plethysmograph (Shelley et al), CASE REPORT, 283
pulse oximeters
computerized collection and analysis of postoperative oxyhemoglobin saturation data (Ilsley et al), 213A
the detection of peripheral venous pulsation using the pulse oximeter as a plethysmograph (Shelley et al), CASE REPORT, 283
the effect of dyshemoglobins on pulse oximetry: part I, theoretical approach and part II, experimental results using an in vitro test system (Reynolds et al), ORIGINAL ARTICLE, 81
experimental and predicted dual oximetry variability (Wong et al), ORIGINAL ARTICLE, 268
failure rate of pulse oximetry in the postanesthesia care unit (Gillies et al), ORIGINAL ARTICLE, 326
pulse oximetry, capnography, and blood gas measurements: reducing cost and improving the quality of care with technology (Roizen et al), ORIGINAL ARTICLE, 237
respirometers
evaluation of five small turbine-type respirometers used in adult anesthesia (Ilsley et al), ORIGINAL ARTICLE, 196
how do you say "mean" in Spanish? (Ortega), CORRESPONDENCE, 210
spectrometers
bronchodilator aerosol propellant interferes with an infrared photoacoustic spectrophotometer respiratory gas analyzer (Hoskin and Gallen), CORRESPONDENCE, 65
mass spectrometry: performance of long catheters (Lerou and van Egmond), CORRESPONDENCE, 68
spectroscopes
near-infrared monitoring of the cerebral circulation (Kurth et al), ORIGINAL ARTICLE, 163
stability and long-term durability of Raman spectroscopy (Lawson et al), ORIGINAL ARTICLE, 241
thrombelastograph
effect of delay and storage on whole-blood clotting analysis as determined by thrombelastography (Orlikowski et al), ORIGINAL ARTICLE, 5
transducers
cable-testing device fails to indicate that hypertension is artifactual (Meyer et al), CASE REPORT, 54
tubes, endotracheal
capnography does not reliable detect double-lumen endotracheal tube malplacement (Kuman et al), CORRESPONDENCE, 207
equipment design errors (Gellis and Body), CORRESPONDENCE, 67
a novel sensor for routine continuous spirometry of intubated patients (Meriläinen et al), KNOWING YOUR MONITORING EQUIPMENT, 374
vaporizers
anesthesia systems. Part II: operating principles of fundamental components (Cicman et al), KNOWING YOUR MONITORING EQUIPMENT, 104

Eye
conjunctiva
bilateral conjunctival oxygen tension measurements (Asmussen), CORRESPONDENCE, 381

Gastrointestinal tract
esophagus
electroencephalogram spectral edge frequency, lower esophageal contractility, and autonomic responsiveness during general anesthesia (Ghouri et al), ORIGINAL ARTICLE, 176
the esophageal temperature gradient in anesthetized children (Bloch et al), ORIGINAL ARTICLE, 73

Heart
cardiac output
arterial pulse contour analysis trending of cardiac output: hemodynamic manipulations during cerebral arteriovenous malformation resection (Weissman et al), 347
artificial neural networks used to estimate cardiac output from phonocardiograms (Kück et al), 222A
a neural network used to calculate cardiac output using small injectate volumes in the dog (Orr and Westenskow), 223A
electrocardiography
editorial introduction to the preoperative electrocardiogram controversy (Blitt), CLINICAL CONTROVERSY, 101
the usefulness of the preoperative electrocardiogram (Roizen), CLINICAL CONTROVERSY, 101
rate
noninvasive vegetative switch control of heart rhythm in anesthesia (Astakhov et al), 227A
tamponade
fatal cardiac perforation caused by the dilator of a central venous catheterization kit (Mitchell et al), CASE REPORT, 288
Hyperemia
peripheral vascular effects on auscultatory blood pressure (Rabbany et al), ORIGINAL ARTICLE, 9
Hypoxia
changes in renal vein, renal surface, and urine oxygen tension during hypoxia in pigs (Wong et al), ORIGINAL ARTICLE, 1

Kidney
changes in renal vein, renal surface, and urine oxygen tension during hypoxia in pigs (Wong et al), ORIGINAL ARTICLE, 1

Manpower, anesthesiology assistants
a technology education program for anesthetists (Frazier et al), 236A
Measurement techniques
blood gas analysis
an adaptive controller for the administration of closed-circuit anesthesia during spontaneous and assisted ventilation (Sharma et al), ORIGINAL ARTICLE, 25
base excess and inappropriate bicarbonate (Fagan), CORRESPONDENCE, 67
changes in renal vein, renal surface, and urine oxygen tension during hypoxia in pigs (Wong et al), ORIGINAL ARTICLE, 1
near-patient blood gas and electrolyte analyses are accurate when performed by non-laboratory-trained individuals (Zaloga et al), ORIGINAL ARTICLE, 341
blood pressure
cable-testing device fails to indicate that hypertension is artifactual (Meyer et al), CASE REPORT, 54

Measurement techniques *(continued)*
construction and use of catheter-manometer systems (Heimann and Murray), ORIGINAL ARTICLE, 45
noninvasive continuous blood pressure measurement: a clinical evaluation of the Cortronic APM 770 (de Jong et al), ORIGINAL ARTICLE, 18
peripheral vascular effects on auscultatory blood pressure (Rabbany et al), ORIGINAL ARTICLE, 9
a simple index for ventriculoarterial coupling (Urzua et al), CORRESPONDENCE, 208
capnography
absence of a capnogram after positive end-expiratory pressure (Bowie et al), ORIGINAL ARTICLE, 78
cardiac output
arterial pulse contour analysis trending of cardiac output: hemodynamic manipulations during cerebral arteriovenous malformation resection (Weissman et al), ORIGINAL ARTICLE, 347
chromotography
accuracy and cross-sensitivity of 10 different anesthetic gas monitors (Walder et al), ORIGINAL ARTICLE, 364
discriminant analysis
analytical method to differentiate similar electroencephalographic spectra: neural network and discriminant analysis (Veselis et al), ORIGINAL ARTICLE, 257
pattern classification using artificial neural networks and discriminant analysis (Navabi et al), 221A
Doppler ultrasound
real-time automated computerized detection of venous air emboli in dogs (Gibby), ORIGINAL ARTICLE, 354
electrocardiography
algorithm to identify components of arterial blood pressure signals during use of an intra-aortic balloon pump (Elghazzawi et al), ALGORITHM, 297
flowmeters, Doppler
changes in mean blood flow velocity in the middle cerebral artery and corresponding somatosensory evoked potentials during induction of anesthesia (Lörler et al), 152A
intraoperative monitoring of cerebral perfusion during surgery of giant aneurysms: possibilities and limitations (Boecher-Schwarz et al), 153A
transcranial Doppler for physiologic testing of autoregulation (Aaslid), 149A
transcranial Doppler monitoring in cerebral AVM surgery (Schaller and Hassler), 152A
transcranial Doppler monitoring in patients with large brain tumors: effects of thiopental, propofol, and hyperventilation (Schregel et al), 153A
transcranial Doppler sonography in anesthesia and critical care: trend monitoring of cerebral hemodynamics? (Werner et al), 150A
flowmetry
clinical application of constant flow ventilation in anesthetized patients (Wang et al), 219A
Doppler
transcranial Doppler and intracranial pressure: complementary diagnostic tools in neurointensive care medicine (Reinprecht), 154A
transcranial Doppler in patients after severe head injury: correlation between TCD, CBF, ICP, MAP, and CCT findings (Burger et al), 154A
quantitative testing of sympathetic function with laser Doppler flowmetry (Valley et al), ORIGINAL ARTICLE, 252
a respiratory flowmeter based on a modified mainstream CO_2 cuvette (Orr et al), 215A
fluid balance
computer-aided patient care system (Fukui et al), 235A
neural network analysis
analytical method to differentiate similar electroencephalographic spectra: neural network and discriminant analysis (Veselis et al), ORIGINAL ARTICLE, 257
application of artificial neural networks that learn to classify sleep pattern in infants (Litscher et al), 139A
artificial neural networks used to estimate cardiac output from phonocardiograms (Kück et al), 222A
classification of electroencephalographic coherence maps of cognitive processes (Rappelsberger et al), 139A
the combination of on-line Hilbert transformation with neural network classification of electroencephalographic monitoring in neonates (Witte et al), 139A
improving the performance of a neural network-based alarm system (Farrell et al), 223A
neural network classification of spatiotemporal electroencephalographic patterns (Masic), 138A
a neural network used to calculate cardiac output using small injectate volumes in the dog (Orr and Westenskow), 223A
neural networks for electroencephalographic classification: an introduction (Dorffner), 138A
neural networks for electroencephalographic classification: experiences, problems, and new approaches (Klöppel), 138A
pattern classification using artificial neural networks and discriminant analysis (Navabi et al), 221A
neuromuscular block
the Relaxometer: a complete and comprehenseve computer-controlled neuromuscular transmission measurement system developed for clinical research on muscle relaxants (Rowaan et al), ORIGINAL ARTICLE, 31
oscillometry
comparison of systolic blood pressures measured by occlusion plethysmography versus automated oscillometry (Hersack et al), 226A
photometry
comparison of continuous noninvasive blood pressure measurements by photometry with simultaneous intraarterial pressure measurements (Wong et al), 224A
plethysmography
can the pulse oximeter detect peripheral venous pulsation? (Shelley et al), 220A
comparison of systolic blood pressures measured by occlusion plethysmography versus automated oscillometry (Hersack et al), 226A
pulse oximeters
can the pulse oximeter detect peripheral venous pulsation? (Shelley et al), 220A
experimental and predicted dual oximetry variability (Wong et al), ORIGINAL ARTICLE, 268
pulse oximetry
the effect of dyshemoglobins on pulse oximetry: part I, theoretical approach and part II, experimental results using an in vitro test system (Reynolds et al) ORIGINAL ARTICLE, 81

failure rate of pulse oximetry in the postanesthesia care unit (Gillies et al), ORIGINAL ARTICLE, 326
refractometry
refractometry as a calibration standard for gas monitors and vaporizers (Wallroth et al), 216A
respirometry
evaluation of five small turbine-type respirometers used in adult anesthesia (Ilsley et al), ORIGINAL ARTICLE, 196
spectroscopy
comparison of continuous jugular venous oxygen saturation with near-infrared spectroscopy of the brain (Amory et al), 143A
near-infrared monitoring of the cerebral circulation (Kurth et al), ORIGINAL ARTICLE, 163
stability and long-term durability of Raman spectroscopy (Lawson et al), ORIGINAL ARTICLE, 241
spirometry
a novel sensor for routine continuous spirometry of intubated patients (Meriläinen et al), KNOWING YOUR MONITORING EQUIPMENT, 374
tomography
cerebral blood flow measurement in critically ill patients (Barelli et al), 154A
a follow-up of continuous intracranial pressure monitoring and computed tomographic scanning in patients with head trauma: consequences in diagnostic and therapeutic management (Buchinger and Schwarz), 131A
a study comparing computed tomographic scanning and intracranial pressure monitoring (Sabitzer and Lesnik), 131A
Monitoring
anesthesia
future anesthesia workstations and today's priorities (Paulsen), CORRESPONDENCE, 65
integration of monitoring for intelligent alarms in anesthesia: neural networks–can they help (Mylrea et al), ORIGINAL ARTICLE, 31
a reference system in clinical anesthesia (Martens and Zapf), ALGORITHM, 202
blood pressure
acceptable ranges for vital signs during general anesthesia (van Oostrom et al), ORIGINAL ARTICLE, 321
algorithm to identify components of arterial blood pressure signals during use of an intra-aortic balloon pump (Elghazzawi et al), ALGORITHM, 297
cable-testing device fails to indicate that hypertension is artifactual (Meyer et al), CASE REPORT, 54
comparison of continuous noninvasive blood pressure measurements by photometry with simultaneous intraarterial pressure measurements (Wong et al), 224A
comparison of systolic blood pressures measured by occlusion plethysmography versus automated oscillometry (Hersack et al), 226A
construction and use of catheter-manometer systems (Heimann and Murray), ORIGINAL ARTICLE, 45
dynamic response of a neonatal catheter-manometer system in situ (van Langen et al), ORIGINAL ARTICLE, 335
failure of an automated noninvasive blood pressure device: the contribution of human error and software design flaw (Howard), 232A
intraperitoneal hemorrhage following femoral artery cannulation for intraoperative monitoring: an unusual complication (Sim et al), CASE REPORT, 295
monitoring-induced hypotension under consideration of fluorescence-spectrographic oxygen measurement (Wölfel and Knorr), 141A
multimodality monitoring in the intensive care unit: studies in patients with a head injury (Fitch et al), 131A
noninvasive continuous blood pressure measurement: a clinical evaluation of the Cortronic APM 770 (de Jong et al), ORIGINAL ARTICLE, 18
peripheral vascular effects on auscultatory blood pressure (Rabbany et al), ORIGINAL ARTICLE, 9
systemic vascular resistance appears as a nonlinear value during extracorporeal circulation (Urzua et al), 225A
thermoregulatory vasoconstriction increases the difference between radial and femoral artery pressures in healthy volunteers (Urzua et al), 226A
carbon dioxide
acceptable ranges for vital signs during general anesthesia (van Oostrom et al), ORIGINAL ARTICLE, 321
capnography does not reliably detect double-lumen endotracheal tube malplacement (Kumar et al), CORRESPONDENCE, 207
effect of propofol on the relation between arterial CO_2 and cerebral blood flow velocity (Jansen et al), 145A
transcutaneous CO_2 ($P_{tc}CO_2$) monitoring in adults: comparison between 41 and 44°C (Shah et al), 218A
cardiopulmonary
causes of misinterpretation of cardiorespirographic data in cerebral function monitoring in neonates: modeling and clinical examinations (Witte and Rother), 157A
cardiovascular
a simple index for ventriculoarterial coupling (Urzua et al), CORRESPONDENCE, 208
central nervous system
causes of misinterpretation of cardiorespirographic data in cerebral function monitoring in neonates: modeling and clinical examinations (Witte and Rother), 157A
the future of brain monitoring (Rampil), 155A
cerebrospinal fluid pressure
the fidelity and dynamic response of fluid-filled catheter systems for direct measurement of lumbar cerebrospinal fluid pressure (Kumar et al), ORIGINAL ARTICLE, 314
economics
pulse oximetry, capnography, and blood gas measurements: reducing cost and improving the quality of care with technology (Roizen et al), ORIGINAL ARTICLE, 237
electrocardiography
beat-to-beat variability can indicate subtle differences in cardiovascular effects of anesthesia (Maslana et al), 221A
right heart, right principle, wrong catheter (Gould), CORRESPONDENCE, 208
the usefulness of the preoperative electrocardiogram (Roizen), CLINICAL CONTROVERSY, 101
electrocardiology
monitoring of spontaneous bioelectrical rhythms under propofol (Fuchs et al), 144A

Monitoring (*continued*)
electroencephalography
analytical method to differentiate similar electroencephalographic spectra: neural network and discriminant analysis (Veselis et al), ORIGINAL ARTICLE, 257
central nervous system monitoring after organ transplantation (Lehmkuhl et al), 128A
classification of electroencephalographic coherence maps of cognitive processes (Rappelsberger et al), 139A
the combination of on-line Hilbert transformation with neural network classification of electroencephalographic monitoring in neonates (Witte et al), 139A
comparison of electroencephalography, cerebral perfusion pressure, and recovery times following propofol or methohexital sedation in neurosurgical patients (Löffler et al), 146A
continuous, quantitative, artifact-free, on-line electroencephalometry for neuromonitoring during surgery (Dimpfel), 156A
continuous electroencephalographic and oxygen jugular saturation monitoring as a guide to treatment of severe head injury (Procaccio et al), 132A
the effects of plasma laudanosine on the patients with chronic renal failure (Hrska et al), 125A
effects of propofol (Disoprivan) during induction of anesthesia: a topographical electroencephalographic study (Neuhierl et al), 124A
electroencephalogram spectral edge frequency, lower esophageal contractility, and autonomic responsiveness during general anesthesia (Ghouri et al), ORIGINAL ARTICLE, 176
intraoperative topographical electroencephalographic monitoring during steady-state isoflurane-N_2O anesthesia: effect of surgical stimulation (Kochs et al), 123A
a modular multichannel data-acquisition system for biosignals with optical data transfer to a PC (Hadl et al), 156A
monitoring of spontaneous bioelectrical rhythms under propofol (Fuchs et al), 144A
neural network classification of spatiotemporal electroencephalographic patterns (Masic), 138A
neural networks for electroencephalographic classification: an introduction (Dorffner), 138A
neural networks for electroencephalographic classification: experiences, problems, and new approaches (Klöppel), 138A
evoked potentials
artifact detection and removal during auditory evoked potential monitoring (Cluitmans et al), ALGORITHM, 112
brainstem acoustic evoked potentials in encephalitis (Schwarz et al), 129A
central effects of intravenous clonidine in neurosurgical patients: a neurophysiological study (Gabriel et al), 147A
cerebral perfusion pressure and brainstem auditory evoked potentials (Lang et al), 137A
changes in mean blood flow velocity in the middle cerebral artery and corresponding somatosensory evoked potentials during induction of anesthesia (Lörler et al), 152A
coma prognosis by means of electrophysiological variables: possibilities and limits (Lechner et al), 144A
detection of critical focal ischemia using hemodynamic, metabolic, and functional cerebral monitoring (Dinkel), 158A
effects of pH variations on short-latency somatosensory evoked potentials in pigs (Eberle et al), 136A
electroencephalographic and evoked potential monitoring in intensive care medicine: indications, limitations, and quality control (Schoeppner), 127A
electrophysiological monitoring during operations affecting the spinal cord: a retrospective (Freye and Grabitz), 133A
intraoperative median nerve somatosensory evoked potential monitoring in neurosurgery: the role of a differential derivation of subcortical components in the 14-millisecond range (Wagner et al), 134A
monitoring in carotid surgery: evaluation of transcranial Doppler sonography (Langer et al), 142A
nitrous oxide depresses somatosensory evoked responses in anesthetized swine (Schäfer et al), 135A
noninvasive cerebral intensive care monitoring: theory, technology, trends, and practice (Litscher et al), 126A
passive auditory event-related potentials in comatose patients (Windhager et al), 148A
the prognostic value of somatosensory evoked potentials in patients with cerebral fat embolism (Rumpl et al), 128A
quantitative electroencephalography and multimodality evoked potentials as prognostic indeces in postanoxic coma (Barelli et al), 129A
relation between intracranial pressure and serial multimodal evoked potentials in coma (Dauch and Becker), 129A
role of multimodality evoked potentials in head-injured patients (Barelli et al), 137A
somatosensory evoked potential, a prognostic tool for the recovery of motor function following malperfusion of the spinal cord: studies in dogs (Grabitz et al), ORIGINAL ARTICLE, 191
spinal evoked potential in patients undergoing thoracoabdominal aortic reconstruction: a prognostic indicator of postoperative motor deficit (Grabitz et al), ORIGINAL ARTICLE, 186
value of the cognitive evoked potential P300 (Engelhardt and Dierks), 159A
inspired gases
erroneous data from an infrared anesthetic gas analyzer (Morrison and McDonald), CASE REPORT, 293
evaluation of three transportable multigas anesthetic monitors: the Bruel & Kjaer Anesthetic Gas Monitor 1304, the Datex Capnomac Ultima, and the Nellcor N-2500 (Nielsen et al), ORIGINAL ARTICLE, 91
a novel sensor for routine continuous spirometry of intubated patients (Meriläinen et al), KNOWING YOUR MONITORING EQUIPMENT, 374
intracranial pressure
cerebral perfusion pressure and brainstem auditory evoked potentials (Lang et al), 137A
clinical experience with a fiberoptic intracranial pessure monitor (Yablon et al), ORIGINAL ARTICLE, 171
comparison and clinical evaluation of the Spiegelberg intracranial pressure measurement system (Czech et al), 130A
a follow-up of continuous intracranial pressure monitor-

ing and computed tomographic scanning in patients with head trauma: consequences in diagnostic and therapeutic management (Buchinger and Schwarz), 131A
indication and technique for intracranial pressure measurement in head trauma (Schwarz and Buchinger), 130A
relation between intracranial pressure and serial multimodal evoked potentials in coma (Dauch and Becker), 129A
a study comparing computed tomographic scanning and intracranial pressure monitoring (Sabitzer and Lesnik), 131A
therapy of brain edema with glycerol: the relations between pharmacokinetics and intracranial pressure monitoring (Haass), 160A
transcranial Doppler and intracranial pressure: complementary diagnostic tools in neurointensive care medicine (Reinprecht), 154A

oxygen
acceptable ranges for vital signs during general anesthesia (van Oostrom et al), ORIGINAL ARTICLE, 321
bilateral conjunctival oxygen tension measurements (Asmussen), CORRESPONDENCE, 381
changes in renal vein, renal surface, and urine oxygen tension during hypoxia in pigs (Wong et al), ORIGINAL ARTICLE, 1
computerized collection and analysis of postoperative oxyhemoglobin saturation data (Ilsley et al), 213A
experimental and predicted dual oximetry variability (Wong et al), ORIGINAL ARTICLE, 268
near-infrared monitoring of the cerebral circulation (Kurth et al), ORIGINAL ARTICLE, 163

physiologic
issues in displaying patient-controlled analgesia demand data (Milgram et al), 233A

respiratory gases
evaluation of five small turbine-type respirometers used in adult anesthesia (Ilsley et al), ORIGINAL ARTICLE, 196

sympathetic nervous system
central autonomic source activity and its representation by peripheral measurements (Janitzki and Gotte), 157A
quantitative testing of sympathetic function with laser Doppler flowmetry (Valley et al), ORIGINAL ARTICLE, 252

temperature
the esophageal temperature gradient in anesthetized children (Bloch et al), ORIGINAL ARTICLE, 73
urinary bladder temperature monitoring in extensively burned patients (Imaizumi et al), CASE REPORT, 99

vascular
the detection of peripheral venous pulsation using the pulse oximeter as a plethysmograph (Shelley et al), CASE REPORT, 283
quantitative testing of sympathetic function with laser Doppler flowmetry (Valley et al), ORIGINAL ARTICLE, 252
real-time automated computerized detection of venous air emboli in dogs (Gibby), ORIGINAL ARTICLE, 354
ventricular assessment software environment (VASE): a system for the on-line display and analysis of pressure-area loops (Deneault et al), 224A

ventilation
anesthesia systems. Part II: operating principles of fundamental components (Cicman et al), KNOWING YOUR MONITORING EQUIPMENT, 104
comparison of six methods to calculate airway resistance during mechanical ventilation in adults (Hess and Tabor), ORIGINAL ARTICLE, 275

Neuromuscular transmission
the Relaxometer: a complete and comprehenseve computer-controlled neuromuscular transmission measurement system developed for clinical research on muscle relaxants (Rowaan et al), ORIGINAL ARTICLE, 31

Nitroprusside. *see under* Anesthetic techniques: hypotension, induced

Oxygen
blood levels
comparison of continuous jugular venous oxygen saturation with near-infrared spectroscopy of the brain (Amory et al), 143A
continuous electroencephalographic and oxygen jugular saturation monitoring as a guide to treatment of severe head injury (Procaccio et al), 132A
continuous monitoring of cerebral oxygen extraction (Mauritz), 132A

delivery systems
elective use of pressure-limited oxygen insufflation (Scanlon et al), 219A

tension
changes in renal vein, renal surface, and urine oxygen tension during hypoxia in pigs (Wong et al), ORIGINAL ARTICLE, 1

Parasympathetic nervous system
noninvasive vegetative switch control of heart rhythm in anesthesia (Astakhov et al), 227A

Pharmacokinetics
models
transfer function from inspired to expired agent tension (Ji et al), 217A
a unified pharmacokinetic model for intravenous and inhalant drugs (Khodr and Philip), 216A

Pharmacology
clonidine
central effects of intravenous clonidine in neurosurgical patients: a neurophysiological study (Gabriel et al), 147A

glycerol
therapy of brain edema with glycerol: the relations between pharmacokinetics and intracranial pressure monitoring (Haass), 160A

laudanosine
the effects of plasma laudanosine on the electroencephalogram in patients with chronic renal failure (Hrska et al), 125A

prostaglandins E
spinal evoked potential in patients undergoing thoracoabdominal aortic reconstruction: a prognostic indicator of postoperative motor deficit (Grabitz et al), ORIGINAL ARTICLE, 186

Records, anesthesia
an Apple Macintosh client for the Hewlett-Packard Component Monitoring System (Engel), 235A
design of a pen-based anesthesia record (Mead et al), 233A
electronic data archiving for clinical research in the operating room (Calalang and Philip), 231A
future anesthesia workstations and today's priorities (Paulsen), CORRESPONDENCE, 65
improving the user interface of an automated anesthetic recordkeeper (Jones et al), 230A

Surgery
aneurysm
electrophysiological monitoring during operations affecting the spinal cord: a retrospective (Freye and Grabitz), 133A
cardiac
computer-aided patient care system (Fukui et al), 235A
ventricular assessment software environment (VASE): a system for the on-line display and analysis of pressure-area loops (Deneault et al), 224A
cardiopulmonary bypass
intraperitoneal hemorrhage following femoral artery cannulation for intraoperative monitoring: an unusual complication (Sim et al), CASE REPORT, 295
cardiovascular
systemic vascular resistance appears as a nonlinear value during extracorporeal circulation (Urzua et al), 225A
carotid endarterectomy
monitoring in carotid surgery: evaluation of transcranial Doppler sonography (Langer et al), 142A
intra-aortic balloon pumping
algorithm to identify components of arterial blood pressure signals during use of an intra-aortic balloon pump (Elghazzawi et al), ALGORITHM, 297
liver transplantation
central nervous system monitoring after organ transplantation (Lehmkuhl), 128A
neurologic
arterial pulse contour analysis trending of cardiac output: hemodynamic manipulations during cerebral arteriovenous malformation resection (Weissman et al), 347
intraoperative median nerve somatosensory evoked potential monitoring in neurosurgery: the role of a differential derivation of subcortical components in the 14-millisecond range (Wagner et al), 134A
vascular
somatosensory evoked potential, a prognostic tool for the recovery of motor function following malperfusion of the spinal cord: studies in dogs (Grabitz et al), ORIGINAL ARTICLE, 191
spinal evoked potential in patients undergoing thoracoabdominal aortic reconstruction: a prognostic indicator of postoperative motor defict (Grabitz et al), ORIGINAL ARTICLE, 186
Sympathetic nervous system
noninvasive vegetative switch control of heart rhythm in anesthesia (Astakhov et al), 227A

Temperature
monitoring
urinary bladder temperature monitoring in extensively burned patients (Imaizumi et al), CASE REPORT, 99
peripheral vascular effects on auscultatory blood pressure (Rabbany et al), ORIGINAL ARTICLE, 9
thermoregulatory vasoconstriction increases the difference between radial and femoral artery pressures in healthy volunteers (Urzua et al), 226A
transcutaneous CO_2 ($P_{tc}CO_2$) monitoring in adults: comparison between 41 and 44°C (Shah et al), 218A

Ventilation
airway pressure
comparison of six methods to calculate airway resistance during mechanical ventilation in adults (Hess and Tabor), ORIGINAL ARTICLE, 275
an adaptive controller for the administration of closed-circuit anesthesia during spontaneous and assisted ventilation (Sharma et al), ORIGINAL ARTICLE, 25
anesthesia systems. Part II: operating principles of fundamental components (Cicman et al), KNOWING YOUR MONITORING EQUIPMENT, 104
constant flow
clinical application of constant flow ventilation in anesthetized patients (Wang et al), 219A
mechanical
comparison of six methods to calculate airway resistance during mechanical ventilation in adults (Hess and Tabor), ORIGINAL ARTICLE, 275
positive end-expiratory pressure
absence of a capnogram after positive end-expiratory pressure (Bowie et al), ORIGINAL ARTICLE, 78
Vital signs
acceptable ranges for vital signs during general anesthesia (van Oostrom et al), ORIGINAL ARTICLE, 321
